

BULLETIN **TECHNICAL**

October, 2022

Updated Rotavirus Testing

Effective December 1, 2022 the standalone (single test) rotavirus antigen test will be discontinued. Rotavirus is included in the stool pathogen panel (Stool Pathogen Panel PCR), which is the recommended first line test for uncomplicated diarrheal illness.

Please direct any questions to Dr. Karre, Director of Microbiology, at 402-354-7842 or LaNett Whisler, Microbiology Service Leader at 4-4586.
